Description

There is not an app or website that keeps track of the bookings for professional wrestlers. This app allows a wrestler to make a profile and add their booking dates, along with locations of the bookings.

Features

- User Login
- Edit Profile
- Add/Delete Bookings from booking list
- Google Map showing the location of the booking

Planning – User Stories

- As a user I want to be able to view a list of wrestlers and their bookings.
- As a user I want to be able to create my own wrestler profile.
- As a user I want to be able to add bookings to my profile for others to view when and where I am wrestling.
- As a user I want to be able to update my profile.

Planning - Database

I needed a database that could hold information for the wrestler and their bookings. I created this database to have a wrestler, booking, and users table.

Wrestler

- Name
- Height
- Weight
- Hometown

Booking

- Company Name
- Date of Booking
- Address of Booking

CHIKARA PRO

04-21-2018

4711 Wingate Street

Philadelphia, PA

What I learned:

- Google Maps API
- I now have a better understanding of Hibernate.
- After building this project, I know how MVC works together.
- Using JavaScript with Thymeleaf

What's Next:

- I would like to add a calendar for users to view if they do now want a list view.
- I want to make the display of this project easier on the eyes.
- I want to host this project and make it live for people to actually use.
